

**Design**

The container is mounted on the profile plate or attached to an MPS profile using four screws and T-head nuts.

Function

Threaded connections are provided for inflow and outflow and for sensors with threaded connection. A hole is provided for the connection of a heating unit. Threaded holes which are not required, are to be fitted with end plugs.

Note

Tighten the mounting screws carefully.

Permissible operating temperature	max. +65 °C
Capacity	approx. 12 l
Dimensions (external measurements) Width Depth Height	240 mm 190 mm 385 mm
Material	Plastic
Line connections: Screw connections	15 mm pipe-Ø
Subject to change
