

**Design**

The 2/2-way solenoid valve is installed in the piping by means of quick push-pull connectors.

Function

The 2/2-way solenoid valve is a directly actuated valve. When the coil is de-energised, the valve is closed by means of spring force.

Note

For a firm attachment, a pipe clamp may be fitted in front and behind the valve.

Connection	15 mm
Nominal size	6
Pressure range	0 to 0.5 bar
Temperature range (with plastic connectors)	0 to +65 °C
Operating voltage	24 V DC
Power consumption	8 W
<i>Subject to change</i>
